

# OPTIMISING THE OPPORTUNITY<sup>®</sup> WITH COILTEK GOLD HUNTING COILS.

## GOLDSTALKER<sup>®</sup>

The GOLDSTALKER<sup>®</sup> series has been designed with the professional prospector in mind. Delivering superior performance, these coils lead the way in aftermarket coil innovation offering maximum depth capabilities plus superb sensitivity. This hard to find combination means there are now new opportunities in previously worked goldfields.

### 14" ROUND

It has all the characteristics of the old-style solid coil, but with less weight. This round, mid-sized coil is an excellent performer, reducing target retrieval time with good sensitivity and depth capabilities. Its reliability, robustness and smooth operation have made it a popular choice with prospectors over the years.

Size: 355mm  
Weight: 635g / 22.4oz

### 14 x 9" ELLIPTICAL

With the elliptical shape preferred by many prospectors, it has a good ability to pinpoint finds and can be manoeuvred very easily in tighter terrain. Offers excellent sensitivity and good depth for its size.

Robust yet lightweight and well balanced, it can stand harsh fields and operator use and is perfect for all day detecting. It is optimised for the GPX5000 detectors.

Size: 348mm x 225mm  
Weight: 575g / 20.3oz

### 14 x 9" ELLIPTICAL BLITZ

Specifically wound for the new GPX5000 detector this coil, coupled with the 'FINE GOLD' setting, has the potential to brighten up those faint targets, especially the smaller pieces at depths only seen on the new GPX5000.

The coil's ability utilises the already popular shape and size of the 14x9" coil providing excellent manoeuvrability and sensitivity for pinpointing and depth.

Size: 348mm x 225mm  
Weight: 695g / 24.8oz

### 6" ROUND

Perfect for small target hunting in overgrown and rocky areas, mullock heap hunting and crevassing. Offers precise pinpointing ability plus outstanding sensitivity due to its smaller, concentrated magnetic field.

Finds the smaller targets that larger coils have missed. Lightweight and easy to operate, it gives versatility when trying to recover maximum gold from a patch.

Size: 155mm  
Weight: 417g / 14.7oz

### 16" ROUND

This is the perfect choice for open field searching. Offers impressive all-round abilities with excellent depth capabilities and very good sensitivity. Detects deep opportunities, yet still easily finds sub-gram targets close to the surface.

Surprisingly lightweight for its size and durability, it reduces the effort usually associated with searching large areas.

Size: 397mm  
Weight: 795g / 28oz

### 18" ROUND

Deep targets and open fields meet their match with this large GOLDSTALKER<sup>®</sup> coil. Surprisingly light for its size, its depth capabilities allow the operator to detect the deep targets missed by smaller coils.

Under the right conditions, it also performs well with picking up smaller targets located closer to the surface.

Size: 460mm  
Weight: 915g / 32.2oz

### 18 x 12" ELLIPTICAL

With a larger, more efficient sweep path, this elliptical coil covers the ground quickly. Suited to open country detecting as well as tighter terrain where manoeuvrability and lightness is key, it's the most popular of the GOLDSTALKER<sup>®</sup> models.

Excellent sensitivity combined with equally strong depth capabilities. Locates sub-gram particles at reasonable depth; finds deeper targets the others miss.

Size: 470mm x 300mm  
Weight: 795g / 28oz

### 22" ROUND

Weighing in at only 1110g, this large coil is very lightweight for its size and makes light work of searching large areas. It offers a good stable threshold in most circumstances plus the best depth capabilities of the round coils.

Although suited to larger, deeper targets, it still impresses with its sensitivity, during testing it found 2g pieces at approx 25cm deep.

Size: 540mm  
Weight: 1100g / 38.8oz

### 24 x 14" ELLIPTICAL

The largest of our elliptical coils features a new, broader shape. This increase in width compared with the standard 24"x12" adds to the coil's depth capabilities and gives better overall performance.

As with all the elliptical coils, the narrow ends provide good pinpointing ability and manoeuvrability through more dense terrain.

Great as a patch finder or a general search coil, it also picks up smaller targets closer to the surface. Lightweight for swinging all day, it's perfect for searching for a good cross section of targets.

Size: 590mm x 345mm  
Weight: 1018g / 35.9oz

## ORIGINAL

These are the most popular of the original series of COILTEK<sup>®</sup> detector coils which offers a coil for every prospector and every terrain, including waterproof models for searching the shoreline, marshes and creek beds. Combining robust manufacture with great performance, they deliver time and time again.

### 1" PINPOINT PROBE

An essential part of any prospecting kit. Superlight, it produces a tight magnetic field from tip to sides, quickly locating targets once the hole has been dug.

Can be used with the COILTEK<sup>®</sup> Switching Block to make detection and location a fast, seamless process. Available in 2 lengths.

Size: 25mm x 200/500mm  
Weight: 292g / 10.3oz

### 10 x 5" ELLIPTICAL JOEY

Ideal for finding the finer gold on the patch, searching mullock heaps and combing areas of heavy overgrowth. Pinpointing is made easier by the coil's elliptical shape.

Excellent sensitivity, good depth capabilities and a relatively smaller view of the ground make it the choice when searching for smaller targets.

Size: 242mm x 138mm  
Weight: 322g / 11.3oz

### 12 x 8" ELLIPTICAL PLATYPUS

Fully waterproof, this is the coil for prospecting the shoreline, rivers and wet terrains. The coil is potted with epoxy resin, holding all windings secure.

Use it with or without the fitted skid plate - it's tough enough to withstand the knocks and bumps of a normal swing action. Also available with a solid skid plate.

Size: 300mm x 200mm  
Weight: 747g / 26.3oz

### 14" ROUND

One of our best all-round performers. It has shown outstanding performance in most of the world's goldfields, offering excellent depth and sensitivity.

Light and easily manoeuvrable, it suits the open field with little or no overgrowth to hinder its swing. It's extremely robust and will prove its ability time and time again.

Size: 355mm  
Weight: 898g / 31.6oz

### 17 x 11" ELLIPTICAL WALLABY

Another all-round performer, it delivers balance and good manoeuvrability for tight areas, plus excellent depth and sensitivity.

The large elliptical shape gives good ground coverage with the tip making pinpointing of targets easy. Searches in and around terrain and finds sub-gram pieces with ease.

Size: 435mm x 280mm  
Weight: 1018g / 36oz

### 40 x 20" ELLIPTICAL DRAG

Brilliant for locating deep patches while ignoring the sub-gram pieces. The coil's anti-interference (A.I.) configuration was originally made for the salt lakes in Western Australia and it has been used successfully in many countries.

Offers excellent depth capabilities plus it's waterproof, making it the ideal choice for large, wet terrains and prospecting in any weather. Also available in DD configuration.

Size: 1000mm x 510mm  
Weight: 2346g / 82.7oz

MANUFACTURING

OPTIMISING THE OPPORTUNITY<sup>®</sup>

# OPTIMISING THE OPPORTUNITY<sup>®</sup> WITH COILTEK COIN & RELIC COILS.

Building on the technology and success of our Gold Hunting coils, the Coin and Relic series has been specially designed to enhance the performance of coin and relic machines operating in diverse terrains around the world.

## NEW 15" ALL TERRAIN X-TERRA 7.5kHz

In a collaborative effort with Minelab we are the only Global after-market manufacturer of a fully approved X-TERRA coil utilising the VFLEX technology. This is sure to compliment the already outstanding performance of the X-TERRA series of detectors.

With the combination of our already best selling 15" All Terrain coil for the coin hunting machines, and the official inclusion of the VFLEX Technology, we have now produced what many X-TERRA users have been after - a larger coil for more depth and coverage!

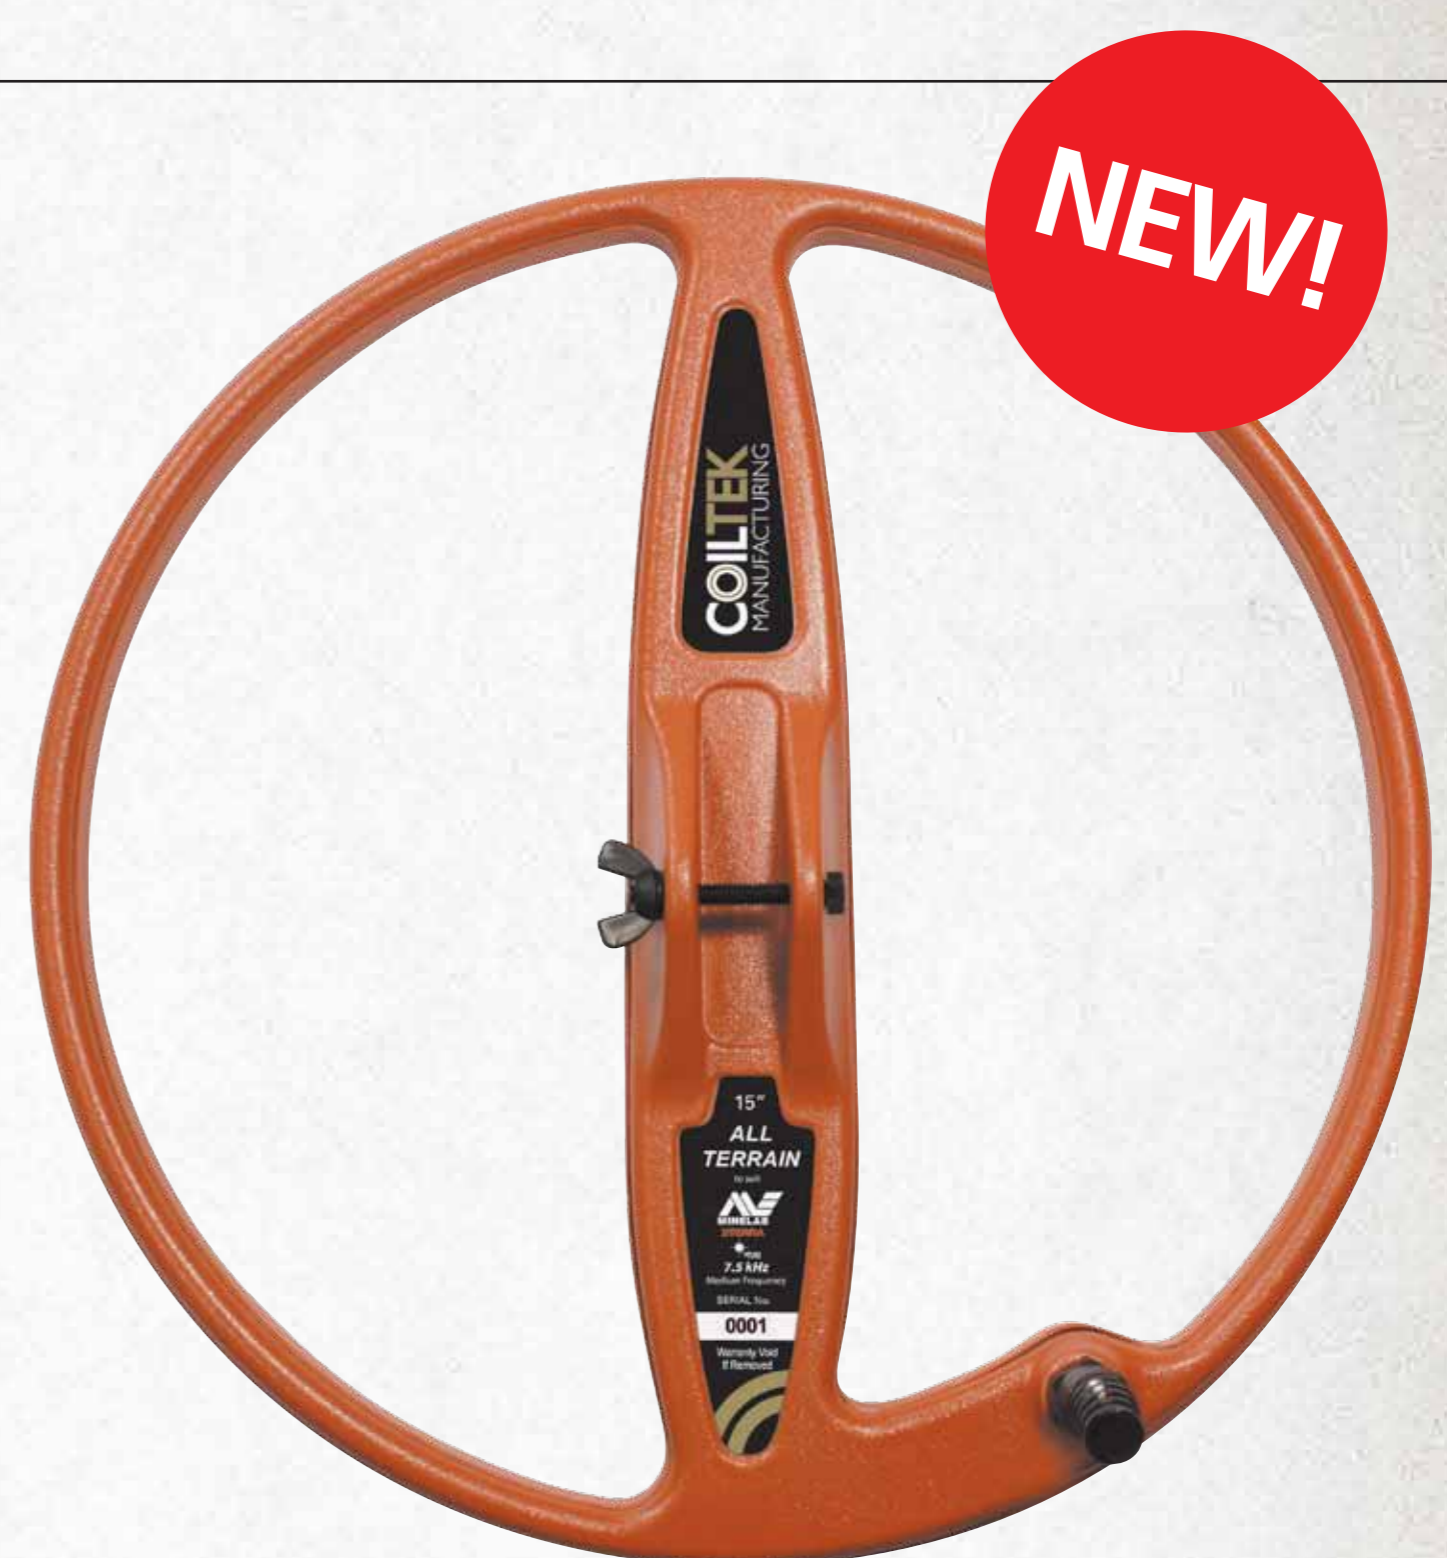

This is a fully waterproof coil which has excellent depth capabilities and also pinpoints easily with either the tip of the coil, or using the pinpoint function on the detector. During testing it already produced a number of significant finds at varying depths. It has good balance on the end of the shaft as it is lightweight for its size and responds well to deep targets.

With a diameter of 15" (370mm) this coil provides the user with a great option for more coverage and better depth than any of the current standard coils which are available. It is produced in the medium frequency (7.5kHz) to help compliment the coils ability to punch deep into the ground and give great overall performance.

Size: 370mm  
Weight: 710g / 25.3oz

### COIL FEATURES

- DD configuration
- 7.5kHz (medium frequency)
- 6 pin plug
- Suits all X-TERRA models
- Fully waterproof
- Lightweight
- 15" diameter (370mm)
- Good stability & sensitivity
- Good for open terrain
- Easy pinpointing
- Robust construction
- Excellent depth

EXCLUSIVE TO COILTEK<sup>®</sup> MANUFACTURING

## ORIGINAL

### 10 x 5" ELLIPTICAL JOEY

This is the ideal choice for dry terrain, such as parks, playgrounds, old townships or sandy beaches. Its shape delivers a tight magnetic field, giving excellent sensitivity and target separation.

Ultra lightweight with outstanding manoeuvrability in tight or debris-ridden areas. The smaller, water-resistant coil also makes pinpointing easy, conveying an accurate location for fast retrieval.

Can be made to suit E-TRAC, Quattro, Safari, Explorer and Sovereign series detectors.

Size: 242mm x 138mm  
Weight: 479g / 16.9oz

### 12 x 8" ELLIPTICAL ALL TERRAIN

Fully waterproof, lightweight and well balanced, the 'platypus' is the one for all day beach hunting and water working. In areas of high trash and targets it stands out with its excellent sensitivity, great pinpointing ability and good target separation.

Plus it's durable and robust - a proven performer in wet and snowy terrains such as the USA and Russia.

Can be made to suit E-TRAC, Quattro, Safari, Explorer and Sovereign series detectors.

Size: 300mm x 220mm  
Weight: 747g / 26.3oz

### 15" ROUND ALL TERRAIN

This coil's outstanding performance has earned it the nickname WOT or Wild Orange Thing. It delivers an increase of up to 30% more depth over standard coils, with minimal reduction in sensitivity.

Fully waterproof, it's the perfect size for open terrain hunting. On beaches at low tide it really shines, sinking low in the water to ably detect smaller targets.

Can be made to suit E-TRAC, Quattro, Safari, Explorer, Sovereign, X-TERRA, Musketeer, and XT series, plus some older Minelab detectors.

Size: 370mm  
Weight: 747g / 26.3oz
